IDENTITY THEFT PREVENTION JUST GOT EASIER New Scheduled Pickup Service for the Destruction of Electronic Records.

July 3, 2008,
Ogdensburg,
NJ. Today, more
than 90 percent of
business records
are stored
electronically. The
only absolute way
to destroy records
saved on
computers, mobile
phones, cds, flash
drives and tapes is
to physically
destroy the device
by shredding.

Back Thru The Future Technology Disposal (BTTF) announces the launch of **Safe Harbor Express (SafeHarborExpress.com)**, the secure, convenient and affordable solution to the challenge of how to destroy electronic records. Shredding prevents any possibility of data recovery and generates nearly 100% recyclable material - a green solution.

Located in northern New Jersey, BTTF is a recognized industry leader and pioneer in the proper environmental handling of electronics and secure data destruction for data storage devices. For 19 years BTTF has supported Fortune 500 companies, Amlaw 100 firms and prominent pharmaceutical, healthcare and financial institutions, as well as federal, state and local government agencies. Now, with Safe Harbor Express scheduled destruction service, BTTF is offering its vast technology disposal expertise to organizations of all sizes throughout the northeastern United States.

To learn about Safe Harbor Express, or to schedule an interview, please contact Sonia Schenker, Special Projects Manager, Back Thru The Future Technology Disposal at 973-823-9752, xt. 22 or send an email to Service@SafeHarborExpress.com # # #
