PRESS RELEASE

Data Destruction Scores Entrepreneurial Success Award
 4/25/2007

Ogdensburg, NJ. April 25, 2007. At a recent awards presentation, Back Thru The Future was pleased to accept the Sussex County Chamber of Commerce Entrepreneurial Success Award.

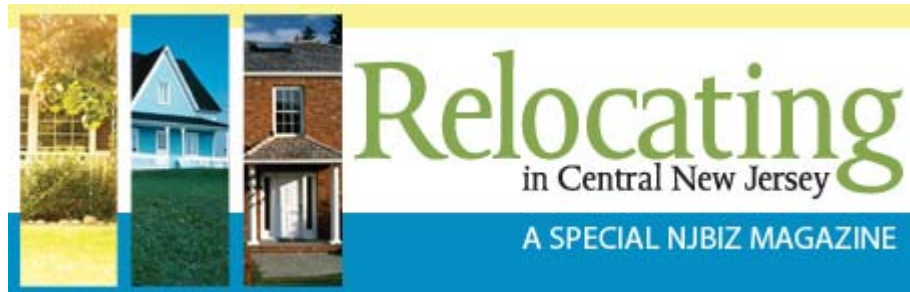

Founded in 1990, Back Thru The Future Computer Recycling is now one of the oldest and largest electronic recycling facilities on the East Coast, moving from Morris County to Sussex County in 2002 and currently occupying a 40,000 square ft warehouse space in Ogdensburg, NJ.

Exploring market trends, Back Thru The Future is at the forefront of a shift in current protocols for destroying electronic files. As every day language admits new words like identity theft, HIPAA, Sarbanes-Oxley and homeland security, companies must have clear-cut data retention and destruction policies. Just as important is the fact that companies are legally bound to protect sensitive client data, even when slated for destruction.

Back Thru The Future's exclusive Safe Harbor Data Destruction process is setting standards for an absolute, easy, auditable, and inexpensive method for secure disposal of electronic records stored on hard drives, cell phones, PDAs, backup tapes and CDs.

Back Thru The Future is EPA and NJ DEP registered; a certified member of the National Association for Information Destruction, a member of Information Systems Security Association and the Institute of Scrap Recycling Industries. Back Thru The Future is also a registered Woman Owned Business Enterprise, member of the Sussex County Chamber of Commerce, and member of New Jersey Association of Women Business Owners.
