Environmental Leadership Award Goes To NJ Computer Recycler

The Sussex County Economic Development Partnership has selected Back Thru The Future Technology Disposal (BTTF) for its 2007 annual environmental leadership award.

“Environmental stewardship is not just a marketing cliché at Back Thru The Future, it has been an integral part of our business plan for 19 years”, states Melanie J. Haga, President and CEO (pictured, in BTTF’s 40,000 square foot facility). “I have always believed computer hardware can and should be kept out of landfills. It’s very rewarding to finally see our industry take technology recycling seriously and it is even more rewarding to be recognized for our efforts within our own community. I am thrilled to accept this award from the Sussex County Economic Development Partnership.”

Back Thru The Future was recently approved by the New Jersey Department of Environmental Protection as a D-licensed electronic recycling facility, one of only seven such licenses in the state. Haga adds, “We anticipate significantly increasing BTTF’s operations in Ogdensburg, New Jersey and generating much needed new green collar employment for our region while aggressively supporting the mission of the Economic Development Partnership”.

Back Thru The Future Technology Disposal operates a 40,000 square foot recycling facility in Northern New Jersey. The facility is a National Association for Information Destruction (NAID) AAA Certified secure data destruction facility for hard drive destruction. All electronic media destruction is performed on site with a meticulous audit trail and documentation system.## #
